SHARVIL SAGALGILE

Junior Penetration Tester | Offensive Security | CompTIA PenTest+ Certified

Ahmednagar, Maharashtra (open to relocate to Pune) | +91 8237032369 | sharvilsagalgile@gmail.com | LinkedIn | GitHub | TryHackMe | sharvil.site

PROFESSIONAL SUMMARY

CompTIA PenTest+ (PT0-003) certified Computer Science graduate (SPPU) pursuing junior penetration tester and red team roles. Completed a 3-month offensive security internship performing reconnaissance and identifying, validating, and reporting web application vulnerabilities against OWASP Top 10 methodology with Nmap and Burp Suite. Ranked in the top 1% globally on TryHackMe. Builds security tooling, including an ESP32-based wireless device and a hardened social media application, with both attacker and defender perspectives.

CERTIFICATIONS

- CompTIA PenTest+ (PT0-003) — October 2026
- Cisco Introduction to Cybersecurity — August 2026
- ISC2 Certified in Cybersecurity (CC) — July 2026

TECHNICAL SKILLS

Penetration Testing: engagement scoping & rules of engagement, pre-engagement & reporting documentation, reconnaissance & enumeration (passive/active, OSINT), vulnerability discovery, validation & prioritization, post-exploitation, privilege escalation & lateral movement, risk-rated reporting & remediation recommendations

Web Application: OWASP Top 10, web application security assessments, common vulnerabilities (XSS, IDOR, authentication flaws, misconfigurations), authentication & API security, secure coding (anti-XSS, anti-SQLi, anti-IDOR, rate limiting, file validation)

Network: TCP/IP fundamentals, network scanning, traffic analysis, BLE/Wi-Fi security testing (deauth, flood, spoofing), firewall configuration

Tools: Burp Suite, Nmap, Wireshark, Kali Linux, Ubuntu/Linux CLI, UFW, Git/GitHub

Programming: Python, Bash, PowerShell, PHP, SQL, HTML, CSS, JavaScript, embedded C/C++ (ESP32/Arduino)

PROFESSIONAL EXPERIENCE

Offensive Security Intern *Carbonbery Technology Pvt. Ltd. | Jan 2026 – Mar 2026 (3 months)*

- Conducted reconnaissance and vulnerability scanning against client-facing web applications and hosts using Nmap and Burp Suite, enumerating open ports, services, and attack surface for each target.
- Identified and validated web application vulnerabilities (e.g., XSS, IDOR, authentication flaws, misconfigurations) under senior pentester guidance, mapped to the OWASP Top 10.
- Authored technical vulnerability reports with risk ratings and remediation guidance, delivered to engagement leads.
- Researched attacker techniques and TTPs and applied findings to ongoing testing engagements.

Web Development Intern *A2Z IT Hub Pvt. Ltd. | Jul 2025 – Sep 2025 (45 days)*

- Designed and deployed a multi-page client website using HTML, CSS, and JavaScript, hosted on GitHub Pages.

FEATURED PROJECTS

Project SHIFT — ESP32-Based Multifunction Pocket Device *Arduino/C++*

- Built a custom ESP32 handheld with an OLED menu UI, 9-button navigation, IMU, and BLE HID remote modes (keyboard, mouse, media, macros) on modular firmware; extending it with wireless security tools (BLE/MAC spoofing, Wi-Fi deauth/flood, universal IR).

Synapse — Full-Stack Social Media Platform *github.com/5H4RV1L/synapse*

- Built core social features (live chat, posts, notifications, authentication flows) and hardened the application with rate limiting, anti-XSS/anti-SQLi protections, file-upload validation, and anti-IDOR safeguards.

Shellscape — Browser-Based Linux & Cybersecurity Learning Platform *shellscape.sharvil.site*

- Built a browser-based, terminal-themed platform teaching Linux and cybersecurity fundamentals with CTF-style challenges.

HANDS-ON SECURITY TRAINING

- Ranked in the top 1% globally on TryHackMe; completed the SEC0, SEC1, and OWASP Top 10 paths; now progressing through PT1.
- Practiced on Hack The Box and PortSwigger Web Security Academy; completed OverTheWire Bandit and OWASP Juice Shop.

EDUCATION

B.Sc. Computer Science — Savitribai Phule Pune University (SPPU) | 2023–2026

Grade: A | CGPA: 7.08 | Languages: English, Hindi, Marathi
